

# Leftist Lexicon Word of the Week

It's been quite a week for former New York Attorney General Eric Schneiderman. For those of you who haven't been following the news lately, Schneiderman has been accused of sexually assaulting at least four women. Normally, I would avoid this type of story like I avoid watching "Keeping Up With the Kardashians," but it piqued my interest for a couple of reasons. One reason is because he is a Democrat who has built his career around fighting sexual assault, even to the point of being a proud supporter of #MeToo.

The other reason has nothing to do with Schneiderman directly. Instead, it has to do with someone on the opposite side of the political spectrum, White House Press Secretary Sarah Huckabee Sanders. Recently, MSNBC host Nicole Wallace asked reporters, "How do you resist the temptation to run up and wring her [Huckabee Sanders] neck?" complete with hand gestures replicating choking a person...in a question about tensions between Huckabee Sanders and the White House Press Corps.

Two different situations that fall under one word the Left slings around like hash browns at a Waffle House: misogyny. It seems to be a complicated, nuanced word to hear the Left talk, but is it?

Not so much.

## **misogyny**

What the Left thinks it means – attacking a woman and her agency through thought, word, and deed

What it really means – attacking a Leftist woman and her agency through presumed thought, word, and deed

When the Left talks of misogyny, it's usually in relation to existing economic or societal structures. In their minds, men run the world and do everything in their power to keep women down. Through this, Leftists weave a convincing narrative covering everything from women having to pay more for certain products like deodorant to women making less money as men for doing the same work to a lack of women in positions of power. All of this is wrapped up in a tidy bow and presented to us as fact.

Of course, it's utter bullshit.

The Left needs women to think they're being oppressed by The Man because that notion keeps them on the Leftist reservation with all the other people who think they're being oppressed and the Left is the only group that can help them. And, believe me, the Left talks a pretty good game when it comes to saying they want women to succeed. But try getting them to support a conservative or Republican woman. They abandon their identity politics faster than Bill Clinton hits on a woman at a Hooters and say "Supporting women doesn't mean supporting women who aren't qualified."

In other words, Leftists support women so long as they think, speak, and act like they want. For anyone else, it's open season.

Which brings us back to Sarah Huckabee Sanders. Because she's not a Leftist, she can never be the victim of misogyny, no matter how vile the sentiments being expressed or how serious the threats to her personally and professionally.

But that sword cuts both ways. If you are a Leftist, you can never be a misogynist because you believe the right way. Even though it appears some of Schneiderman's sexual escapades may have been non-consensual, there are Leftists weaving conspiracy theories stating President Donald Trump was behind it all. Granted, Trump has a lot of power, but he doesn't have

the power to make a powerful man treat women like trash, allegedly. That's all on Schneiderman.

And that's not the whole of it, either. Leftists also find ways to make just about everything misogynistic, even when there is no logical way it could be. One popular example of this is video games. The Left thinks video games are misogynistic if they don't have enough strong female characters...or if they have strong female characters that are attractive to young men (the main demographic of video games)...or if the female characters don't have compelling stories...or if they conform to the same goals as the male characters...or if they are the antagonists...or because their feefees got hurt.

This is one reason I always laugh when Leftists start seeing misogyny everywhere: because they are inventing outrage to justify their beliefs. (That, and they look like rejects from "Battlefield Earth.") Another reason is because Leftists often fail to recognize actual misogyny. Extreme Islam, which actually attacks, kills, and enslaves women? The Left can't be bothered to discuss that. They're too busy protesting the obvious misogyny in Superman not being female!

Or hiding it when one of theirs is guilty of it.

Or attacking a conservative woman for not being one of them.

Leftists have a major blind spot when it comes to misogyny, which makes them not that credible when it comes to spotting misogyny. Instead, let's call out the real misogyny that's out there. Anytime a Leftist calls a conservative woman a horrible name, take them to task for it. Heck, if you really want to make a statement, insist Leftist males give up their positions to conservative women!

After all, they wouldn't want to be misogynists, right?
