

Time to Go

It is high time that the United States withdraws its membership, funding, support, and manpower from the socialist-leaning United Nations. And remove them from US soil.

This does come up for a vote every couple of years or so in Congress. Someone drafts the bill but it either doesn't get voted on or it doesn't get enough votes to pass. This time it needs to pass and come to the President's desk to become law.

The recent UN attacks against the sovereignty of the United States is that organizations 1st step before sending in "peace-keeping" troops. And when that happens our Rights that come from God and spelled out in the first 10 Amendments in the Constitution will become void. And our Rights will come from the UN, where they are privileges that can be taken away at a whim. And we will no longer be a free people.

This is no conspiracy. The UN is UN-American, a pro one-world government sponsor that promotes Leftist ideals, discrimination against Christians and true freedom. And these people need to be sent packing.

American servicemen did not shed their blood and die to have America controlled by other men and nations who do not believe in the freedoms that our nation was built upon. Our membership in this corrupt organization needs to end now. And the blessed memory of those who gave the ultimate sacrifice will not be in vain.

Vote US out of the UN.
